Well it s real and this workbook is one of the cures. The Fourth Grade Slump occurs because around fourth grade kids begin to make the transition from learning to read to reading to learn. Kids are expected to know more and more information, retain that information, and answer multiple choice questions based off of what they have read. Now we want to put the child in the driver seat. This book guides kids in how to ask questions using the title and illustration on the cover. It puts the child in charge of figuring out what words are unknown and how to pay attention to their meaning while reading. How many kids go to the table of contents to read it? Well, now they will have a reason. If they turn the heading into a question, then their question has a greater chance of getting answered in that section. Each child will learn how to answer questions developed by the test makers effectively with the tools in this book. Quadruple retention with these tips and you will significantly set up the child for non-fiction reading success. Here is what you can expect from using this book.
