Brand New Book ***** Print on Demand *****.Before the industrial age, human beings routinely relied upon tracking skills for tens of thousands of years as a means to run down prey, avoid predators and determine whether other tribes were transiting their land. To see an indigenous tracker at work, one could almost swear that the uncanny skills were based in part on telepathy. Nothing could be further from the truth - trackers rely upon a suite of standard rules and techniques which can be learned by anyone and put to good use in the field. Although it will take years of practise and training for tracking abilities to develop to the extent they become almost unconscious, the basics skills of tracking and countertracking are worth learning for every soldier. It is therefore not surprising that the US Army Special Forces have been steadily reviving the nearly lost arts of tracking and countertracking for the past several years. From the preface page: SF Soldiers routinely employ unconventional tactics and techniques while conducting operations unilaterally and with indigenous assistance. The conduct of SF differs...
