

Pick Your Poison: How Our Mad Dash to Chemical Utopia Is Making Lab Rats of Us All

Filesize: 2.8 MB

Reviews

Great eBook and useful one. it was actually writtern really completely and useful. You are going to like the way the article writer publish this publication.

(Prof. Ernestine Emar)

PICK YOUR POISON: HOW OUR MAD DASH TO CHEMICAL UTOPIA IS MAKING LAB RATS OF US ALL

Wiley. Hardcover. Book Condition: New. Hardcover. 256 pages. Dimensions: 9.3in. x 6.3in. x 1.1in. How the chemicals in everyday products are killing us and what the government is not doing about it. Did you know that nontoxic usually means never tested? Or that many green cleaners are good for the environment but terrible for you? Chemist and activist Monona Rossol goes from under your sink to the halls of the powerful, tracing America's love affair with chemicals that kill, explaining how much worse the problem has gotten in the last decade. Shocking and appalling and completely reckless, that's how she describes the current prevalence of harmful chemicals in our everyday lives. Scientists have started linking our increased rates of cancer, autism, obesity, and asthma (among others) to chemical exposure and Rossol points the finger directly at the companies and executives making millions of dollars by polluting our environment and introducing toxic chemicals into our bodies. She chronicles how everyday toxins get into our bodies and accumulate over time and provides us with inspiration to make changes at the checkout lines. She also explains that Americans are not nearly as well protected by our government as we might think we are. Unlike the European Union, the United States allows chemical companies to produce toxins for use in U. S. consumer products with little to no oversight. While her tone is wry and entertaining, she's also well informed, and her fact-filled treatise makes for absolutely terrifying reading. Includes surprising explanations about the chemicals in furniture, detergents, paints, makeup, toys, spray cleaners, ionic air purifiers, art supplies, and more. Reveals how many eco-friendly products are good for the environment but bad for your health. Exposes the truth about government regulations, product testing, and labeling, including why terms such as nontoxic (which often means never tested), hypoallergenic, and...
